1. Policy statement

The Department of Education (the Department) maintains robust risk management and business continuity practices that are an integral part of decision making and support the proactive identification, assessment and management of risks. Business continuity management ensures the Department is able to prepare for and respond to the impact of any major disruptions in order to recover and return to normal operations as soon as possible.

2. Policy rules

2.1 Risk Management

All employees will:

- review activities and key objectives to identify and assess risks;
- develop treatment plans to manage the impact of risks (where necessary);
- record and monitor risks; and
- inform line managers of significant risks.

Line managers and Principals will communicate risks to employees, to assist them in understanding risks, the basis on which decisions are made and the reasons why particular actions are required.

Guidance

Please refer to the [Risk Management Guidelines](#) for school and non-school site processes (staff only).

Further information on risk management is available on Ikon.

2.2 Business Continuity Management

Where the continuity of operations is not covered by other Department plans such as the incident management plan for schools, line managers and principals will, as appropriate:

- conduct and document a business impact analysis;
- review the business impact analysis at least every 12 months;
- for any critical business activities, document business continuity plans that include:

- strategies, requirements and procedures for continuity of the critical activities; and
- business resource requirements to support the continuity of the critical activities;
- review and update any business continuity plans at least every 12 months; and
- conduct exercises on a regular basis to test or validate any business continuity plans.

Guidance

Please refer to the [Business Continuity Management Guidelines](#) for school and non-school site processes (staff only).

Further information on business continuity management is available on Ikon.

3. Responsibility for Implementation and Compliance

Principals and line managers are responsible for implementing this policy.
Executive Directors and Directors are responsible for compliance monitoring.

4. Scope

This policy applies to all employees.

5. Definitions

Business continuity management

A process to ensure the timely resumption and delivery of critical business activities, in the event of a major disruption, by maintaining the business resources required to support delivery of those services.

Business continuity plan

Documented processes that guide the Department to respond, recover, resume and restore to a pre-defined level of operation following a major disruption.

Business impact analysis

The process of assessing the potential consequences of an outage to the Department's business activities over varying periods of time, and establishing the maximum acceptable outage time, in which any critical activities must be resumed following a major disruption.

Line manager or principal

An employee responsible for a discrete area.

Risk

The chance of something happening that will have an impact on objectives. The impact may be positive or negative.

Risk assessment

The process used to understand the impact of risks and estimate the level of risk.

Risk controls

The measures currently in place that reduce the impact of risks. A risk may have more than one control.

Risk identification

The process of finding and describing the nature, sources and causes of risks.

Risk management

Risk management encompasses the culture, processes and structures that are used to effectively manage risks.

Risk monitoring

A periodic assessment of risks to determine the continuing effectiveness of risk controls and treatments.

Risk treatment

A process to select one or more treatments to avoid, reduce, transfer or share a risk.
